

VMT Series Vacuum Meat Tumbler

INTRODUCTION

VMT Series Vacuum Meat Tumbler is in a vacuum state, using the principle of physical impact, to make the material flip up and down in the drum, collide and rub against each other, and produce a large area of evenly distributed massage and pickling, so that the even distribution of pickling liquid in the material is more conducive. The salt-soluble protein is extracted to the greatest extent at the fastest speed, thereby increasing the water holding capacity of the product, improving the elasticity, sliceability and taste of the product, and greatly improving the yield of the product.

APPLICATION

The vacuum meat tumbler is mainly used for the marinating and processing of soy sauce, ham, bacon, barbecue, sausage, leisure, poultry and other meat products and shrimp and other seafood.

FEATURES

- With pulmonary breathing function, the product does reciprocating movement of expansion and contraction in the drum, improving the tissue structure of the meat, improving the knot strength and water retention of the meat, improving the elasticity and yield of the product, and reducing cooking losses;
- Enhance the tenderness and structural stability of meat, improve the slicing quality of meat products, and prevent breakage during slicing.
- Single-speed tumbling, one-time vacuuming or production according to customer requirements.

- The machine is made of high-quality stainless steel, the round head has large rolling space, reasonable design, and low operating noise;
- The unique arc-shaped or in-line design of the blade makes the marinade evenly distributed, does not cause damage to the marinade, and improves the tenderness and appearance of the product;
- Waterproof computer control;
- It has the functions of continuous tumbling, intermittent tumbling, overturning and discharging.

Product Details

Technical Parameters

Model	Drum Capacity(L)	Power	Output(kg)	Inner Diameter	Outer Dimension
VMT-50	50L	1.1KW	28KG	600mm	840x500x930mm
VMT-100	100L	1.1KW	60KG	600mm	1200x750x1200mm
VMT-200	200L	2.2KW	120KG	800mm	1230x710x1300mm
VMT-300	300L	2.2KW	150KG	1000mm	1250x800x1500mm
VMT-400	400L	3.75KW	200KG	1000mm	1500x800x1500mm
VMT-500	500L	3.75KW	250KG	1000mm	2000x1000x1500mm
VMT-600	600L	3.75KW	350KG	1000mm	2100x1000x1600mm
VMT-800	800L	5.5KW	450KG	1200mm	2000x1250x1800mm
VMT-1000	1000L	5.5KW	600KG	1200mm	2500x1550x2000mm

Warranty & Package

Warranty: 24 months from B/L date

Package: International Standard Veneer Case
