

VSP Series Vacuum Skin Packaging Machines

INTRODUCTION

WINTRUE VSP Series Vacuum Skin Packaging Machines are suitable for vacuum skin preservation packaging of cooked food, cold meat, seafood, fast food, etc. The equipment adopts a PLC programmable control system, the working parameter setting and control are precise and stable, and the working status is clear at a glance.

APPLICATION

WINTRUE Vacuum Skin Packaging Machine is a kind of automated forming and vacuum skin packaging equipment. It's especially suitable to pack meat, fish, codfish, tuna, salmon, shrimp, steak, sausage etc. frozen, cold or fresh food, as well as any product which can be put in a container, such as microwaved food, preserved foods, cold/hot food, agriculture products, dry food, cosmetics, medicine, or plastic items.

FEATURES

- Rigid structure made from stainless steel and corrosion resistant aluminum, ensure the highest food hygiene standard.
- Simple design promotes easy maintenance.
- Touch screen display with PLC control system provides a user-friendly interface.
- Very safe operations due to multiple impact resistant acrylic panels.
- German-made Bush pump can perform independent vacuum packaging, MAP packaging, and Skin packaging.

PRODUCT DETAILS

SPECIFICATIONS

Model	VSP-750
Overall Dimension	950x950x1160mm
Vacuum Chamber Size	700x500x60mm
Vacuum Pump	Busch, Germany
PLC	Mitsubishi
Food Height	Up to 60mm
Main Material	SUS 304 Stainless Steel
Power	10KW
Electrical	380V 3PH 50Hz (can be customized)
Machine Weight	320kg

WARRANTY & PACKAGE

Warranty: 24 months from B/L date

Package: International Standard Veneer Case
